21 When implementing linear regression of some dependent variable y on the set of independent variables $\mathbf{x} = (x_1, \ldots, x_r)$, where r is the number of predictors ,which of the following statements will be true?

a) $\beta_{0,1,\ldots}$, β_r are the **regression coefficients**.

b) Linear regression is about determining the **best predicted weights** by using the **method of ordinary least squares**.

c) E is the random interval

d) Both a and b

22)

What indicates that you have a **perfect fit** in linear regression?

a) The value $R^2<1$,which corresponds to SSR=0
b) The value $R^2=0$,which corresponds to SSR=1
c) The value $R^2>0$,which corresponds to SSR=1
d) The value $R^2=1$,which corresponds to SSR=0

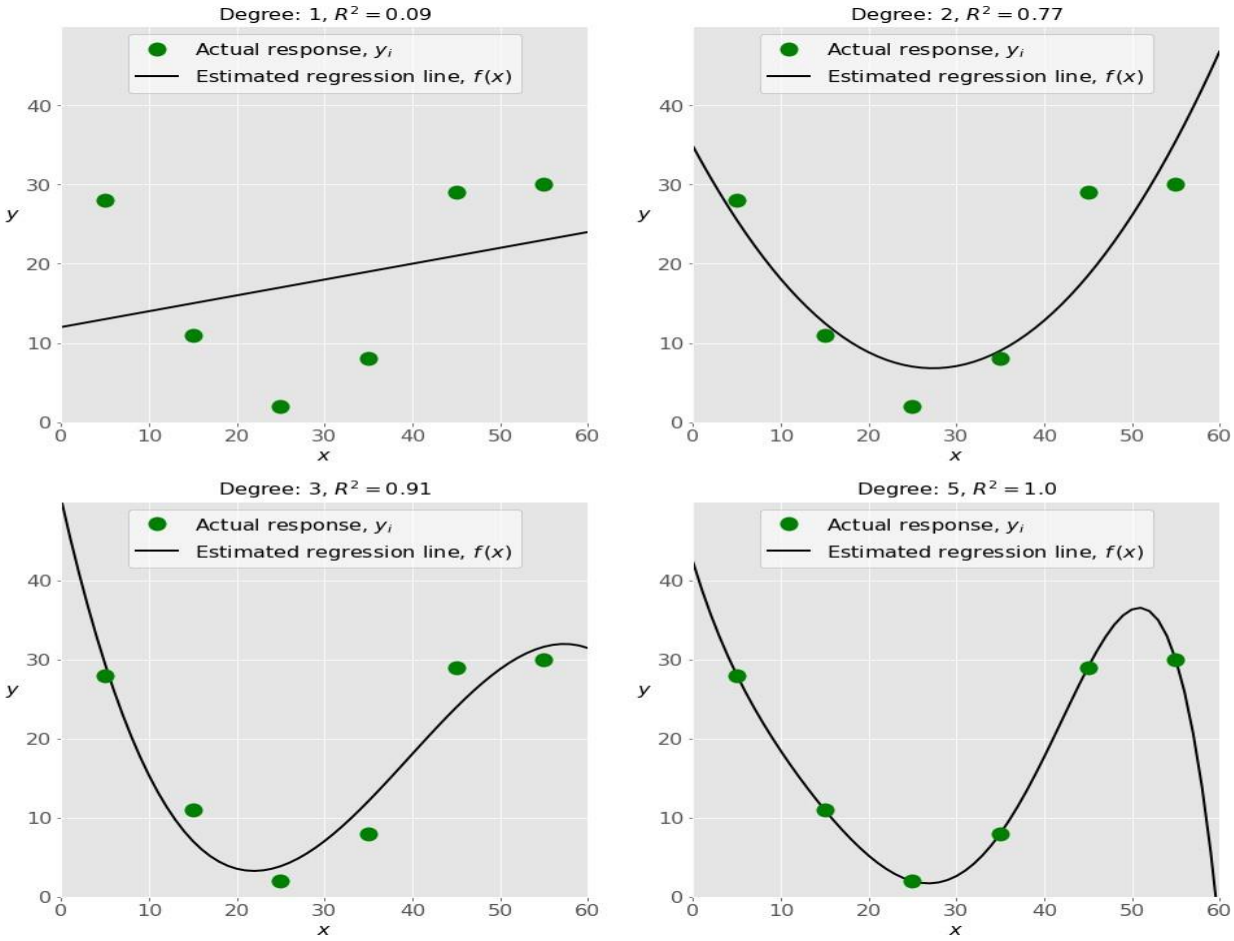
23)

In simple linear regression, the value of **what**s hows the point where the estimated regression line crosses the y axis?

a) Y
b) B0
c) B1
d) F

24)

Check out these four linear regression plots:



Which one represents an **under fitted** model?

a) The bottom-left plot

b) The top-right plot

c) The bottom-right plot

d) The top-left plot

25)

There are five basic steps when you're implementing linear regression:

- **a.** Check the results of model fitting to know whether the model is satisfactory.
- **b.** Provide data to work with, and eventually do appropriate transformations.
- **c.** Apply the model for predictions.
- **d.** Import the packages and classes that you need.
- **e.** Create a regression model and fit it with existing data.

However,thosestepsarecurrentlylistedinthewrongorder.What'sthecorrect order?

a) e, c, a, b, d
b) e, d, b, a, c
c) d, e, c, b, a
d) d, b, e, a, c

26) Which of the following are optional parameters to Linear Regression in scikit-learn?

a) Fit
b) fit_intercept
c) normalize
d) copy_X
e) n_jobs
f) reshape

27) While working with scikit-learn, in which type of regression do you need to transform the array of inputs to include non linear terms such as x^2?

a) Multiple linear regression

b) Simple linear regression

c) Polynomial regression

28) You should choose stats models over scikit-learn when:

A) You want graphical representations of your data.

b) You're working with non linear terms.

c) You need more detailed results.

d) You need to include optional parameters.

29) _____is a fundamental package for scientific computing with Python. It offers comprehensive mathematical functions, random number generators, linear algebra routines, Fourier transforms, and more. It provides a high-level syntax that makes it accessible and productive.

a) Pandas

b) Numpy

c) Stats model

d) scipy

30) _____ is a Python data visualization library based on Matplotlib. It provides a high-level interface for drawing attractive and informative statistical graphics that allow you to explore and understand your data. It integrates closely with pandas data structures.

a) Bokeh
b) Seaborn
c) Matplotlib
d) Dash
